github.com/Md-Jahid-Hasan-10 | Codeforces: Jahid__Noob | CodeChef: jahid_noob

Education

Jahangirnagar University, Savar, Dhaka — Feb 2023 – Jan 2027 (expected)
B.Sc. in Information and Communication Technology, CGPA: **3.75** (up to 6th semester)

Professional Experience

Trainee Software Engineer, **Brain Station 23 PLC** — October 2026 – Present

Projects

Event-Driven Banking Microservices — *Spring Boot, Kafka, Redis* **GitHub**

- Built a **10-service** banking platform with Spring Boot, Spring Cloud, and Apache Kafka; transfers run as a **saga with automatic reversal**, timeouts, and a transactional outbox
- Ensured reliability with **idempotent consumers, event-id deduplication, dead-letter topics**, and **Resilience4j circuit breakers**; validated with 14 failure drills and ledger integrity checks
- Designed a **Redis-backed OTP service** (hashed codes, TTL, atomic Lua verification, resend cooldown) with AES-GCM encrypted events and JWT validation at the API gateway
- Added observability: **AOP request/response logging, OpenTelemetry tracing**, Prometheus, Loki, 7 Grafana dashboards, 20 alert rules
- Team of 2: owned 6 of 11 repositories (gateway, user, OTP, notification, event bus, UI)

DigitVision: Real-Time Handwritten Digit Classifier using CNN — Data Science Project Live | GitHub

- Developed a real-time handwritten digit classifier using Convolutional Neural Networks (CNNs)
- An interactive web application allowing users to upload or draw digits for instant model prediction

Achievements

- ICPC Asia West Continental 2025–26 — Top **2%** (44th overall, 9th in Bangladesh)
- **8th place** in ICPC Asia Dhaka Regional 2025 (Team JU_Jabian_6.1)
- **8th place** in NSU IUPC 2026 (Team JU_Kamikaze)
- Codeforces **Expert** (max rating 1617), CodeChef 1801 (4-star, top 5%)
- Solved **4000+ problems**; participated in **15+ IUPC and ICPC onsite contests**

Skills

Languages: Java, C, C++, JavaScript, Python, SQL, HTML, CSS
Backend & Architecture: Spring Boot, Spring Cloud (Gateway, Eureka), REST APIs, JWT, FastAPI, Microservices, Event-Driven Architecture, Saga, Transactional Outbox
Messaging, Data & Observability: Apache Kafka, Redis, PostgreSQL, Resilience4j, OpenTelemetry, Prometheus, Grafana, Loki, Tempo
Frontend & Tools: Next.js, React, Docker (Compose), Maven, Git/GitHub, Postman, Linux (CLI)
Machine & Deep Learning: Supervised Learning, Classification, CNN, ANN/MLP, NLP, Data Preprocessing, NumPy, Pandas, Matplotlib, Seaborn, NLTK

Leadership and Extracurricular Activities

Competitive Programming Trainer, *UFTB Programming Club* — May 2026 – Aug 2026
Competitive Programming Bootcamp Trainer, *Programming Club, Univ. of Asia Pacific* — Nov 2025
Logistics Team Head, *CP Community, IIT, Jahangirnagar University* — June 2025 – Present
